

THE POCHE WEEKLY RECORD.

SATURDAY.....SEPTEMBER 25, 1880

A Washington dispatch says it is estimated that the amount of gold and silver coin now in this country aggregates \$370,418,914, which, with the paper circulation of \$700,000,000, makes the total circulating medium of the country \$1,270,418,914. This, estimating the population at 50,000,000, gives a specie circulation of 11.44 per capita, and of paper 10.45; making a total circulation of 25.49 per capita from the most creditable data obtainable. It appears that only Great Britain and France now possess a greater gold circulation than the United States. Germany has within the last sixteen months lost nearly \$120,000,000 of the gold circulation, the larger portion of which has been absorbed by the United States and France.

A person who is intimately connected with the Bonanza firm and familiar with the opinions as well as business of Col. Fair, says the Gold Hill News, said that if Col. Fair should run for the United States Senate he would not run as a Democrat; that he was not a rigid partisan, never had been a Democrat, and that his views were more Republican than Democratic. If he consented to stand in for the United States Senate at all it would be on the Republican side—he would fight Mr. Sharon on his own dunghill, and would beat him, too.

The New York Tribune says that President Diaz, of Mexico, has made a bold effort to satisfy the three American companies, which are seeking Mexican grants, by tendering important privileges to each should his offer be ratified by the Mexican Congress, and turned to account by the parties. There will be within a few years a railroad from the Mexican Capital to the Pacific Coast, and trunk lines to Texas and Arizona, where each will connect with the American system.

The statement which has been going the rounds of the public press, to the import that considerable quantities of gold had been found in the waters of the hot springs of Calistoga in solution, turns out to be one of the humbugs of the day. The State Mineralogist of California, after a careful examination, says they "contain no trace of gold."

The Supreme Court in California has decided that the present county officers in that State hold office two years longer, instead of retiring at the end of two years as heretofore.

The Sharonites defeated the opposition at the primaries held in Virginia City last Monday and secured the control of the convention which assembled Thursday.

Michael Devitt, one of the prominent Irish agitators, was extended a royal welcome by the Irish citizens in San Francisco upon his arrival in that city.

The Democratic parade in San Francisco last Saturday evening was a very imposing demonstration. The column marched thirty-five men abreast.

The Republicans of Virginia City held a large and enthusiastic meeting Monday evening. The meeting was thoroughly anti-Sharon.

On last Saturday, in Chicago, Maud S trotted a mile in 2:10, in the face of a strong wind.

A German scientist has succeeded in obtaining a chemical composition, by means of which a mirror image may be fixed and sold as a photograph. With this composition the mirror surface is painted and the back part of the mirror receives also a coating of oil. The mirror thus prepared, is held before to be photographed. The oil coating evaporates and the likeness of the person remains in natural colors on the light surface. The image so fixed is brought into a bath, and is exposed for a half hour in the sunlight before it is ready for delivery.

Considerable complaint is made that thousands of salmon heavy with spawn are being received and sold in this city. The salmon are caught by Italian fishermen living at Rio Vista. The canneries will not use them, as the fish are unfit for food in such a condition. The city dealers are unanimous in desiring that the close of the season should be extended from September 15th to October 1st, in order to prevent the wholesale destruction of spawn which threatens to depopulate the rivers of those fish.

A Nashua man left a cannon ball on the grass in front of his house, and sixteen boys, nine middle aged men, two old men, and one woman who had pretty stockings on mistook it for a football, and the men hopped around and made faces and swore profusely, and the woman tried to look as though she merely pushed it to see what it was as she limped away.

An experienced man says that if cigarette smoking is continued by American boys, they will grow faster in vice than in stature, and the next generation will be one of idiots and monkeys.

LATEST NEWS BY MAIL.

BOSTON, September 21.—Over half the horses hereabouts have distemper resembling the epizootic of 1872. The veterinary surgeons say that in a few hours no horses will be left unaffected. Most of them have been incapacitated for a week.

CHICAGO, September 21.—Mrs. Hazard, of Monticello, Illinois, gave birth to five babies last Sunday. Two lived. Boston, September 20.—Governor Davis telegraphs from Augusta: I shall be elected by 300 or 400 plurality without doubt.

CHICAGO, September 20.—The local Democratic managers in Indiana have convinced Chairman Barnum, of the National Committee, that his scheme to import Plaisant and other Maine flatists to solidify the Greenback vote in that State would be a dangerous experiment. Nobody knows just who and what Greenbackers are this year, but it is certain that they are not the same men who voted for Peter Cooper in 1876. A harrowing suspicion rests on the average Democratic mind in Hoosierdom that most of the late day converts to flatism are Democrats, and under these circumstances it is not thought wise to work up any special excitement among men of that class. Mr. Barnum, who sees the point, has gone home.

NEW YORK, September 21.—A dispatch was received at the headquarters of the Democratic National Committee to-night from Fort Kent, Maine, giving Plaisant 160 majority, and making his majority in 497 towns 174. Five towns are still to hear from, which gave in 1876. Talbot, Democrat, 62; Conner, Republican, 17.

PORTLAND, September 21.—The returns from all but one town, Sheridan, are received, leaving a plurality of 179 for Davis, less 20, which Sheridan gave the Fusionists last year. But a partial comparison made with the returns made to the Secretary of State, shows errors enough in the telegraphic returns to give a clear plurality to Plaisant. These returns will have to be compared with the returns of the Secretary of State, in order to establish their correctness.

STATE ITEMS.

The Times-Review says that a miner named Thomas Ceeck was killed by a cave in the Grand Prize mine.

The Ormsby county assessment this year will fall short \$200,000, and but 800 poll tax receipts have been issued.

The Reno Gazette quotes hay in that market as follows: Loose hay in stack, \$10 to \$12; baled clover and mixed, \$13 to \$16; baled best timothy, \$20.

According to official report the ore vein recently cut on the 2000 level of the Ophir is ten feet wide, and assays from \$21 to \$138 per ton.

Carson Times: A quartette of "soiled doves" made things tropical for each other in Kaiser's restaurant last evening about six o'clock. It appeared to be three to one, with the one on top.

Governor Kinkaid offers a reward of \$250 for the arrest and delivery to the State Prison of the escaped prisoners, John B. McTague and Albert Whitfield. One half the reward will be paid for either.

We are reliably informed, says the Eureka Leader, that another important strike was made in the Richmond mine about ten days since, which resulted in the development of an immense body of ore under the Tip Top ground.

Eureka Sentinel: It is rumored, on good authority, that one of our prominent mining properties is shortly to be taken hold of by a wealthy English corporation. In fact, the sale has already been consummated.

Ward Reflex: C. H. Ashmeade, a former resident of Ward, was married in Rico, Colorado, on the 15th to a "Deitcher" girl just 15 years old. "She's a young thing, but she could leave her mother."

Carson Appeal: Any person knowing of the whereabouts of William Collett formerly of Trenton, Missouri, will please communicate with the Appeal office. If Mr. Collett will communicate he will hear something to his advantage from the East.

G. W. Mardis, better known as "Allegany," an old and respected citizen of Elko county, was foully murdered by a Chinaman known as "New York Charley," near Island Mountain, on the 10th instant. He was shot and stabbed. The murderer was arrested, confessed to having done the deed, and was then taken by his countrymen and killed and buried.

Eureka Sentinel: A correspondent writes that Cherry Creek is at present the largest and most populous mining district in White Pine, and the outlook for the future is most flattering. The Star mine is running steadily and is turning out bullion regularly. About \$12,000 per week is being shipped; \$4,000 in bullion will be sent by Tuesday's stage. The mine is looking exceedingly well.

Eureka Sentinel: Arhadillow Tarloase for the killing of Wm. H. Harrison, will be sentenced next Wednesday. Yesterday morning early, the jury returned a verdict of "guilty of manslaughter." The penalty is ten years or less. During the proceedings a plea of insanity was entered for the defendant, and this may have had much to do with the rendering of such a verdict.

Reno Gazette: Sharp, the Bodie stage robber, was brought up on lightning train this morning, and taken to Carson. He is a man of rather prepossessing appearance, with nothing rough in his manner or talk. He talks like an educated man, and probably attended Sunday school when a boy. He displayed great coolness when asked about the robbery, and talked freely about the affair, without, however, committing himself in any way. He is of medium height and weighs about 160 pounds.

Reno Gazette: The salt marsh in Hot Springs valley recently located by Chapins Alexander and Bridges, was surveyed several years ago by the Jones & Kinkead Mining Co. It shows salt on the surface good enough for milling purposes, and the company expected to draw their supply from the marsh. The original locators allowed their claim to lapse. The present locators propose to prospect the marsh thoroughly, with a view to the production of fine salt. They will have prospect holes bored next week to ascertain the nature of the ground below the surface, and whether the marsh can be made to yield good salt in abundance or not.

Gold Hill News: About midnight, and just after the accident in the Con. Imperial night before last, the wife of Mat, Winnie was found by officer Sheehan on her way to the Imperial works. She said she had been awakened just before, by her husband, who came all mangled to her bedside and told her that he had been killed in the mine. She had got up, dressed herself and started to ascertain the truth of what she was indeed only too well convinced was true. Mr. Sheehan went with her to the works, ascertained there that there had in reality been a fearful accident, that Mr. Winnie was indeed killed, and then took her home. Mrs. Winnie had not been told of the accident except as above mentioned until after she met officer Sheehan here. Is a nut for mental philosophers to crack.

Some of the French journals give very flattering accounts of the progress of the preliminary work on the tunnel which is to connect France and England. It is stated that the shaft is sunk to the stratum in which the tunnel is to be cut, and that those engaged in the work are about to sink another shaft and to lower the machinery for boring under the channel. The work on the tunnel is expected to be finished in two or three years.

Professor Palmieri considers it proven that great earthquakes are always preceded by a season of preliminary earth-tremblings. He believes that by means of telegraphically connected stations for observing and reporting these tremblings, it would be possible to foretell earthquakes, just as storms are now foretold, and to issue warnings to threatened districts three days in advance.

An old farmer's wife, who had a servant that was notorious for breakfast dishes, on one occasion fell asleep in church. During her slumbers her elbow unluckily overturned a Bible, when, to the amusement of her fellow-worshippers, she was heard to mutter in a very audible voice: "Another bowl, ye hissic."

A Texas man taught his wife how to shoot so as to protect herself, and the first time he came home late he received a bullet in his leg.

Eli Perkins says Agnes Jenks fibs and Agnes says that Eli is a liar. Who says that these persons can't tell the truth.

What a beautiful thing is a rosy cheek! How great the contrast when the blush settles on the nose!

NEW TO-DAY.

FOR ASSEMBLYMAN.

TIMOTHY SEGUIN

Announces himself as a candidate for Assemblyman, subject to the decision of the Republican County Convention.

FOR SHERIFF.

O. P. SHERWOOD

Announces himself as a candidate for Sheriff of Lincoln county, subject to the decision of the Republican County Convention.

Day Silver Mining Company.—Location of principal place of business San Francisco, California. Location of works, Jack-rabbit District, Lincoln county, Nev.—Notice is hereby given that at a meeting of the Board of Directors, held on the 23rd day of September, 1880, an assessment (No. 7) of Fifteen (15) Cents per share was levied upon the capital stock of the corporation, payable immediately in United States gold coin, to the Secretary, at the office of the Company, Room 15, No. 310 Pine street, San Francisco, California.

Any stock upon which this assessment shall remain unpaid on the twenty-fifth (25th) day of October, 1880, will be delinquent, and advertised for sale at public auction, and unless payment is made before will be sold on Monday, the twenty-second (22nd) day of November, 1880, to pay the delinquent assessment, together with costs of advertising and expenses of sale. By order of the Board of Directors. J. W. FEW, Secretary. Office—310 Pine street, Room 15, San Francisco, California. no25-td
